

June 12, 2024

Patient: Danny DePaul

Date of Birth: 8/4/75

Date of Visit: 6/12/24

To Whom it May Concern:

Danny DePaul was seen in my clinic on 6/12/24 at 3:40 PM.

Danny sustained a moderate severe concussion on 5/19/24. This caused headaches, neck pain, blurry vision, dizziness, vertigo, difficulty concentrating and difficulty with memory. His symptoms are slowly improving but not fully resolved as of 6/12/24. This has caused her to miss classes and assignments. Please allow him to withdraw from the class

Sincerely

Dr John Doe
