Connect Your Computer to the HDTV

**Step 1:** Locate the HDMI port on your computer. It will look similar to an USB port and will be labeled “HDMI.”

**Step 2:** Make sure your computer is turned off. Pull out one of the HDMI cables in the middle of the table and plug it into the HDMI port on your computer.

**Step 3:** You can also plug in your computer’s power adapter into the provided power outlets on the media table located below the HDMI cable connectors.

**Step 4:** Push the button of the corresponding HDMI port on the HDMI Switcher located below the power outlets.

**Step 5:** Using the TV remote turn on the TV. On the remote press the INPUT button.

**Step 6:** After pressing the INPUT button a menu will appear on the TV, displaying the input list. Select and click on the “HDMI” icon.

**Step 7:** Turn on your computer. The TV will send a signal to your computer about the format needed; you may have to agree to a couple of changes on your computer. The information displayed on your computer should now be appearing on the TV screen and you can use your computer’s touchpad and keyboard.
