

Your DePaul University 403(b) Retirement Plan

# ENROLLMENT GUIDE

## Invest some of what you earn today for what you plan to accomplish tomorrow.

Dear DePaul University 403(b) Retirement Plan employee:

It's a pleasure to let you know that you will be enrolled in the DePaul University 403(b) Retirement Plan. Take a look and see what a difference the Plan could make in achieving your goals.

If you have not enrolled in the Plan within 60 days of your eligibility date, you will be automatically enrolled in the Plan at a contribution rate of 5% of your pretax eligible earnings and your contributions will be invested in the Vanguard Target Retirement Fund with the target retirement date closest to the year you might retire, based on your current age and assuming a retirement age of 65, at the direction of DePaul University. You will also be enrolled in the Automatic Increase Program, which will automatically increase the amount you defer by 1% on an annual basis. We encourage you to take an active role in the Plan and choose a contribution rate and investment options that are appropriate to you. If you do not wish to contribute to the Plan, you must change your contribution rate to 0% within the first 60 days of your employment.

### **Benefit from:**

**Convenience.** Your contributions are automatically deducted regularly from your paycheck.

**Tax savings now.** Your pretax contributions are deducted from your pay before income taxes are taken out. This means that you can actually lower the amount of current income taxes you pay each period. It could mean more money in your take-home pay versus saving money in a taxable account.

**Tax-deferred savings opportunities.** You pay no taxes on any pretax earnings until you withdraw them from your account, enabling you to keep more of your money working for you now.

**Portability.** You can roll over eligible savings from a previous employer into this Plan. You can also take your plan vested account balance with you if you leave the company.

**Investment options.** You have the flexibility to select from investment options that range from more conservative to more aggressive, making it easy for you to develop a well-diversified investment portfolio.

**Online beneficiary.** With Fidelity's Online Beneficiaries Service, you can designate your beneficiaries, receive instant online confirmation, and check your beneficiary information virtually any time.

**Catch-up contributions.** If you make the maximum contribution to your plan account, and you are 50 years of age or older during the calendar year, you can make an additional catch-up contribution of \$7,500 in 2024.

To learn more about what your plan offers, see "Frequently asked questions about your plan" later in this guide.

Participate in your plan and invest in yourself today.

# Frequently asked questions about your plan.

Here are answers to questions you may have about the key features, benefits, and rules of your plan.

## **When can I enroll in the Plan?**

You are immediately eligible to participate in the Plan if you are a full-time or part-time faculty or staff employee. Student Workers, Leased Employees and Independent Contractors are not eligible to participate in the Plan. As an eligible employee, you may begin salary deferrals any time upon hire.

## **How do I enroll in the Plan?**

If you have not enrolled in the Plan within 60 days from your date of hire, you will be automatically enrolled in the Plan at a contribution rate of 5% of your pretax eligible earnings.

Based on your date of birth and assuming a retirement age of 65, you will be invested in the Vanguard Target Retirement Fund, with a corresponding target retirement date. Target Date Funds are an asset mix of stocks, bonds and other investments that automatically becomes more conservative as the fund approaches its target retirement date and beyond. Principal invested is not guaranteed.

We encourage you to take an active role in the Plan and to choose a contribution rate and investment options that are appropriate for you. If you do not wish to contribute to the Plan, you must change your contribution rate to 0% within the first 60 days of your date of hire. You may change your contribution rate at any time online, or by calling the Fidelity Retirement Benefits Line at 1-800-343-0860.

## **How much can I contribute?**

Through automatic payroll deduction, you may contribute up to 100% of your eligible contributions. In addition, you can

automatically increase your retirement savings plan contributions each year through the Annual Increase Program. Sign up online by accessing the "Contribution Amount" section on NetBenefits®, or by calling the Fidelity Retirement Benefits Line at 1-800-343-0860.

## **What is the Annual Increase Program?**

Plan participants will be enrolled in the Annual Increase Program - a convenient way to help boost workplace savings contributions on a regular basis to keep on track to meet your retirement goals. Each year, Plan participants contributing less than 10% will see their contribution rate increase by 1% until they reach the 10% employee contribution threshold, unless they elect otherwise. If you would prefer to elect an annual increase percentage different from the designated 1%, or if you elect not to participate in the Annual Increase Program, please contact Fidelity at 1-800-343-0860 or by going online and indicate your preferences before January 1 of each plan year.

## **What is the IRS contribution limit?**

The IRS contribution limit for 2024 is \$23,000.

## **Does the Employer contribute to my account?**

You are eligible to receive the Employer matching contributions each pay period beginning the first day of the month after completion of one year of service with 1,000 hours worked (or course load equivalent). You must be age 21 and defer at least 5% of your eligible compensation to receive the Employer match, which is 10% of your eligible compensation.

**How do I designate my beneficiary?**

If you have not already selected your beneficiaries, or if you have experienced a life-changing event such as a marriage, divorce, birth of a child, or a death in the family, it's time to consider your beneficiary designations. Fidelity's Online Beneficiaries Service offers a straightforward, convenient process that takes just minutes. To make your elections, click on the "Profile" link, then select "Beneficiaries" and follow the online instructions.

**What are my investment options?**

To help you meet your investment goals, the Plan offers you a range of options. You can select a mix of investment options that best suits your goals, time horizon, and risk tolerance. The many investment options available through the Plan include conservative, moderately conservative, and aggressive funds. A complete description of the Plan's investment options and their performance, as well as planning tools to help you choose an appropriate mix, are available online.

**What are the single fund solution options in my plan?**

If the idea of getting professional help to manage your investments appeals to you, your plan offers Target Date Funds. With Target Date Funds, the investment mix of stocks and bonds automatically becomes more conservative as the target retirement date approaches. Principal invested is not guaranteed at any time, including at or after the fund's target date. Choose the fund that represents your anticipated year of retirement.

**What if I don't make an investment election?**

We encourage you to take an active role in the DePaul University 403(b) Retirement Plan and choose investment options that best suit your goals, time horizon, and risk tolerance. If you do not select specific investment options in the Plan, your contributions will be invested in the Vanguard Target Retirement Fund with the target retirement date closest to the year you

might retire, based on your current age and assuming a retirement age of 65, at the direction of DePaul University.

If no date of birth or an invalid date of birth is on file at Fidelity, your contributions may be invested in the Vanguard Target Retirement Income Fund. More information about the Vanguard Target Retirement Fund options can be found online.

Target Date Funds are an asset mix of stocks, bonds and other investments that automatically becomes more conservative as the fund approaches its target retirement date and beyond. Principal invested is not guaranteed.

**What catch-up contribution can I make?**

As long as you have reached or will reach age 50 by year end and are making the maximum plan or IRS contribution, you may make an additional catch-up contribution each pay period. Going forward, catch-up contribution limits will be subject to cost of living adjustments (COLAs) in \$500 increments.

**When am I vested?**

When you are "vested" in your savings, it effectively means the money is yours to keep. You are always 100% vested in your own contributions to the DePaul University 403(b) Retirement Plan, as well as the matching contributions.

**Can I take a loan from my account?**

Although your plan account is intended for the future, you may borrow from your account for any reason.

Learn more about and/or request a loan online, or by calling the Fidelity Retirement Benefits Line at 1-800-343-0860.

**Can I make withdrawals?**

Withdrawals from the Plan are generally permitted when you terminate your employment, retire, reach age 59½, become permanently disabled, have severe financial hardship, as defined by your plan.

Learn more about and/or request a withdrawal online, or by calling the Fidelity Retirement Benefits Line at 1-800-343-0860.

### **Can I move money from another retirement plan into my account in the DePaul University 403(b) Retirement Plan?**

You are permitted to roll over eligible pretax contributions from another 401(k) plan, 401(a) plan, 403(b) plan, or 457(b) governmental plan account or eligible pretax contributions from conduit Individual Retirement Accounts (rollover IRAs) and certain non-conduit individual retirement accounts (traditional IRAs, Simplified Employee Pension plans, and "SIMPLE" IRA distributions made more than two years from the date you first participated in the SIMPLE IRA). A conduit IRA is one that contains only money rolled over from an employer-sponsored retirement plan that has not been mixed with regular IRA contributions.

Additional information can be obtained online, or by calling the Fidelity Retirement Benefits Line at 1-800-343-0860.

**Be sure to consider all your available options and the applicable fees and features of each before moving your retirement assets.**

### **Where can I find information about exchanges and other plan features?**

Learn about loans, exchanges, and more online. In particular, you can access loan modeling tools that illustrate the potential impact of a loan on the long-term growth of your account. You will also find a withdrawal modeling tool, which shows the amount of federal income taxes and early withdrawal penalties you might pay, along with the amount of earnings you could potentially lose by taking a withdrawal. Additional information can be obtained by calling the Fidelity Retirement Benefits Line at 1-800-343-0860.

# Investment Options

Here is a list of investment options for the DePaul University 403(b) Retirement Plan. For up-to-date performance information and other fund specifics, go to [www.netbenefits.com/depaul](http://www.netbenefits.com/depaul).

## Target Date Funds

Placement of investment options within each risk spectrum is only in relation to the investment options within that specific spectrum. Placement does not reflect risk relative to the investment options shown in the other risk spectrums.

Investment options to the left have potentially more inflation risk and less investment risk

Investment options to the right have potentially less inflation risk and more investment risk

Vanguard Target Retirement 2020 Fund  
Vanguard Target Retirement 2025 Fund  
Vanguard Target Retirement Income Fund

Vanguard Target Retirement 2030 Fund  
Vanguard Target Retirement 2035 Fund  
Vanguard Target Retirement 2040 Fund

Vanguard Target Retirement 2045 Fund  
Vanguard Target Retirement 2050 Fund  
Vanguard Target Retirement 2055 Fund  
Vanguard Target Retirement 2060 Fund  
Vanguard Target Retirement 2065 Fund  
Vanguard Target Retirement 2070 Fund

Target date investments are generally designed for investors expecting to retire around the year indicated in each investment's name. The investments are managed to gradually become more conservative over time. The investment risks of each target date investment change over time as its asset allocation changes. They are subject to the volatility of the financial markets, including equity and fixed income investments in the U.S. and abroad and may be subject to risks associated with investing in high yield, small cap and foreign securities. Principal invested is not guaranteed at any time, including at or after their target dates.

The chart below lists the assigned fund the DePaul University 403(b) Retirement Plan believes will best fit your diversification needs should you not select an investment option.

Your Birth Date*	Fund Name	Target Retirement Years
Before 1953	Vanguard Target Retirement Income Fund	Retired before 2018
January 1, 1953 - December 31, 1957	Vanguard Target Retirement 2020 Fund	Target Years 2018 - 2022
January 1, 1958 - December 31, 1962	Vanguard Target Retirement 2025 Fund	Target Years 2023 - 2027
January 1, 1963 - December 31, 1967	Vanguard Target Retirement 2030 Fund	Target Years 2028 - 2032
January 1, 1968 - December 31, 1972	Vanguard Target Retirement 2035 Fund	Target Years 2033 - 2037
January 1, 1973 - December 31, 1977	Vanguard Target Retirement 2040 Fund	Target Years 2038 - 2042
January 1, 1978 - December 31, 1982	Vanguard Target Retirement 2045 Fund	Target Years 2043 - 2047

This spectrum, with the exception of the Domestic Equity category, is based on Fidelity's analysis of the characteristics of the general investment categories and not on the actual investment options and their holdings, which can change frequently. Investment options in the Domestic Equity category are based on the options' Morningstar categories as of 04/30/2024. There may be a number of funds in each category and each may have a significantly different risk profile as compared to other funds within that category as well as compared to funds in other categories on the spectrum. Morningstar categories are based on a fund's style as measured by its underlying portfolio holdings over the past three years and may change at any time. These style calculations do not represent the investment options' objectives and do not predict the investment options' future styles. Investment options are listed in alphabetical order within each investment category. Risk associated with the investment options can vary significantly within each particular investment category and the relative risk of categories may change under certain economic conditions. For a more complete discussion of risk associated with the mutual fund options, please read the prospectuses before making your investment decisions. The spectrum does not represent actual or implied performance.

# ▶ Fidelity BrokerageLink®

**Fidelity BrokerageLink®** provides expanded investment choices beyond the standard plan lineup that allow you more options to manage your retirement savings. BrokerageLink® includes investments beyond those in your plan's standard lineup. You should compare investments and share classes that are available in your plan's lineup with those available through BrokerageLink, and determine the available investment and share class that is appropriate for your situation. The plan fiduciary neither evaluates nor monitors the investments available through BrokerageLink. It is your responsibility to ensure that the investments you select are suitable for your situation, including your goals, time horizon, and risk tolerance. To enroll, and for more information about BrokerageLink, including the Plan's *BrokerageLink Fact Sheet*, the *BrokerageLink Commission Schedule*, and the *BrokerageLink Brochure*, go to [netbenefits.com](http://netbenefits.com) and click on "Quick Links," then select "BrokerageLink."

# Investment Options

*Before investing in any mutual fund, consider the investment objectives, risks, charges, and expenses. Contact Fidelity for a mutual fund prospectus or, if available, a summary prospectus containing this information. Read it carefully.*

---

## DFA International Value Portfolio Institutional Class

**VRS Code:** 842921

**Fund Objective:** The investment seeks long-term capital appreciation.

**Fund Strategy:** The Portfolio is a feeder portfolio and pursues its objective by investing substantially all of its assets in its corresponding master fund, the DFA International Value Series (the "DFA International Value Series" or the "Series") of the DFA Investment Trust Company (the "Trust"), which has the same investment objective and policies as the portfolio. The advisor intends to purchase securities of large companies associated with developed market countries that the advisor has designated as approved markets.

**Fund Risk:** Foreign securities are subject to interest-rate, currency-exchange-rate, economic, and political risks, all of which may be magnified in emerging markets. Value stocks can perform differently than other types of stocks and can continue to be undervalued by the market for long periods of time. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Fund short term trading fees:** None

**Who may want to invest:**

- Someone who is seeking to complement a portfolio of domestic investments with international investments, which can behave differently.
- Someone who is willing to accept the higher degree of risk associated with investing overseas.

**Footnotes:**

- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.
- 

## Fidelity® 500 Index Fund

**VRS Code:** 002328

**Fund Objective:** Seeks to provide investment results that correspond to the total return (i.e., the combination of capital changes and income) performance of common stocks publicly traded in the United States.

**Fund Strategy:** Normally investing at least 80% of assets in common stocks included in the S&P 500 Index, which broadly represents the performance of common stocks publicly traded in the United States.

**Fund Risk:** Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments.

**Fund short term trading fees:** None

**Who may want to invest:**

- Someone who is seeking the potential for long-term share-price appreciation.
- Someone who is seeking both growth- and value-style investments and who is willing to accept the volatility associated with investing in the stock market.

**Footnotes:**

- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.
- The S&P 500 Index is a market capitalization-weighted index of 500 common stocks chosen for market size, liquidity, and industry group representation to represent U.S. equity performance.
- Returns prior to May 4, 2011 are those of the Premium Class and reflect the Premium Class' expense ratio. Had the Institutional Premium Class' expense ratio been reflected, total returns would have been higher.

---

## Fidelity® Extended Market Index Fund

**VRS Code:** 002365

**Fund Objective:** Seeks to provide investment results that correspond to the total return stocks of mid- to small-capitalization United States companies.

**Fund Strategy:** Normally investing at least 80% of assets in common stocks included in the Dow Jones U.S. Completion Total Stock Market Index, which represents the performance of stocks of mid- to small-capitalization U.S. companies.

**Fund Risk:** Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Investments in smaller companies may involve greater risks than those in larger, more well known companies.

**Fund short term trading fees:** None

**Who may want to invest:**

- Someone who is seeking the potential for long-term share-price appreciation.
- Someone who is seeking both growth- and value-style investments and who is willing to accept the generally greater volatility of investments in smaller companies.

**Footnotes:**

- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.
  - The Dow Jones U.S. Completion Total Stock Market Index is an unmanaged index that represents all U.S. equity issues with readily available prices, excluding components of the S&P 500.
  - Returns prior to September 8, 2011 are those of the Premium Class and reflect the Premium Class' expense ratio. Had the Institutional Premium Class' expense ratio been reflected, total returns would have been higher.
- 

## Fidelity® Growth Company K6 Fund

**VRS Code:** 003458

**Fund Objective:** Seeks capital appreciation.

**Fund Strategy:** Normally investing primarily in common stocks. Investing in companies that Fidelity Management & Research Company LLC (FMR) believes have above-average growth potential (stocks of these companies are often called "growth" stocks). Investing in domestic and foreign issuers. Using fundamental analysis of factors such as each issuer's financial condition and industry position, as well as market and economic conditions, to select investments.

**Fund Risk:** Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Growth stocks can perform differently from the market as a whole and other types of stocks and can be more volatile than other types of stocks. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks.

**Fund short term trading fees:** None

**Who may want to invest:**

- Someone who is seeking the potential for long-term share-price appreciation.
- Someone who is willing to accept the generally greater price volatility associated with growth-oriented stocks.

**Footnotes:**

- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.
- 

## Fidelity® Short-Term Treasury Bond Index Fund

**VRS Code:** 003049

**Fund Objective:** Seeks a high level of current income in a manner consistent with preservation of capital.

**Fund Strategy:** Normally investing at least 80% of assets in securities included in the Bloomberg 1-5 Year U.S. Treasury Index. Normally maintaining a dollar-weighted average maturity of three years or less. Engaging in transaction that have a leveraging effect on the fund.

**Fund Risk:** Bond funds contain interest rate risk (as interest rates rise bond prices usually fall); the risk of issuer default; and inflation risk. Leverage can increase market exposure and magnify investment risk.

**Fund short term trading fees:** None

**Who may want to invest:**

- Someone who is seeking a fund that invests primarily in securities issued by the U.S. government and its agencies or instrumentalities.
- Someone who is seeking to diversify an equity portfolio with a more conservative investment option.

**Footnotes:**

- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.
- The Bloomberg U.S. Treasury 1-5 Year Index is a market value-weighted index of investment-grade fixed-rate public obligations of the U. S. Treasury with maturities between one and five years.
- Weighted average maturity (WAM) is the weighted average of all the maturities of the securities held in a fund. WAM for money market funds can be used as a measure of sensitivity to interest rate changes. Generally, the longer the maturity, the greater the sensitivity. WAM for money market funds is based on the dollar-weighted average length of time until principal payments must be paid, taking into account any call options exercised by the issuer and any permissible maturity shortening devices, such as demand features and interest rate resets. For bond funds, WAM can be used as a measure of sensitivity to the markets. Generally, the longer the maturity, the greater the sensitivity. The WAM calculation for bond funds excludes interest rate resets and only takes into account issuer call options if it is probable that the issuer of the instrument will take advantage of such options.
- Returns prior to October 4, 2017 are those of the Premium Class and reflect the Premium Class' expense ratio. Had the Institutional Premium Class' expense ratio been reflected, total returns would have been higher.

---

## Fidelity® U.S. Bond Index Fund

**VRS Code:** 002326

**Fund Objective:** Seeks to provide investment results that correspond to the aggregate price and interest performance of the debt securities in the Bloomberg U.S. Aggregate Bond Index.

**Fund Strategy:** Normally investing at least 80% of the fund's assets in bonds included in the Bloomberg U.S. Aggregate Bond Index. Using statistical sampling techniques based on duration, maturity, interest rate sensitivity, security structure, and credit quality to attempt to replicate the returns of the Index using a smaller number of securities. Engaging in transactions that have a leveraging effect on the fund, including investments in derivatives - such as swaps (interest rate, total return, and credit default) and futures contracts - and forward-settling securities, to adjust the fund's risk exposure. Investing in Fidelity's central funds (specialized investment vehicles used by Fidelity funds to invest in particular security types or investment disciplines).

**Fund Risk:** In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks. The fund can invest in securities that may have a leveraging effect (such as derivatives and forward-settling securities) which may increase market exposure, magnify investment risks, and cause losses to be realized more quickly.

**Fund short term trading fees:** None

**Who may want to invest:**

- Someone who is seeking potential returns primarily in the form of interest income rather than through an increase in share price.
- Someone who is seeking to diversify an equity portfolio with a more conservative investment option.

**Footnotes:**

- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.
- The Bloomberg U.S. Aggregate Bond Index is an unmanaged market value-weighted index for U.S. dollar denominated investment-grade fixed-rate debt issues, including government, corporate, asset-backed, and mortgage-backed securities with maturities of at least one year.
- Duration is a measure of a security's price sensitivity to changes in interest rates. Duration differs from maturity in that it considers a security's interest payments in addition to the amount of time until the security reaches maturity, and also takes into account certain maturity shortening features (e.g., demand features, interest rate resets, and call options) when applicable. Securities with longer durations generally tend to be more sensitive to interest rate changes than securities with shorter durations. A fund with a longer average duration generally can be expected to be more sensitive to interest rate changes than a fund with a shorter average duration.
- Returns prior to May 4, 2011 are those of the Premium Class and reflect the Premium Class' expense ratio. Had the Institutional Premium Class' expense ratio been reflected, total returns would have been higher.

---

## Loomis Sayles Core Plus Bond Fund Class N

**VRS Code:** 895868

**Fund Objective:** The investment seeks high total investment return through a combination of current income and capital appreciation.

**Fund Strategy:** Under normal market conditions, the fund will invest at least 80% of its net assets (plus any borrowings made for investment purposes) in bonds, which include debt securities of any maturity. In addition, it will invest at least 65% of its net assets in investment grade securities. The fund will generally seek to maintain an effective duration of +/- 2 years relative to the Bloomberg U.S. Aggregate Bond Index.

**Fund Risk:** In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. The fund may invest in lower-quality debt securities that involve greater risk of default or price changes due to potential changes in the credit quality of the issuer. Foreign securities are subject to interest-rate, currency-exchange-rate, economic, and political risks, all of which may be magnified in emerging markets. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Fund short term trading fees:** None

**Who may want to invest:**

- Someone who is seeking potential returns primarily in the form of interest income rather than through an increase in share price.
- Someone who is seeking to diversify an equity portfolio with a more conservative investment option.

**Footnotes:**

- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.
  - The Bloomberg U.S. Aggregate Bond Index is an unmanaged market value-weighted index for U.S. dollar denominated investment-grade fixed-rate debt issues, including government, corporate, asset-backed, and mortgage-backed securities with maturities of at least one year.
  - Duration is a measure of a security's price sensitivity to changes in interest rates. Duration differs from maturity in that it considers a security's interest payments in addition to the amount of time until the security reaches maturity, and also takes into account certain maturity shortening features (e.g., demand features, interest rate resets, and call options) when applicable. Securities with longer durations generally tend to be more sensitive to interest rate changes than securities with shorter durations. A fund with a longer average duration generally can be expected to be more sensitive to interest rate changes than a fund with a shorter average duration.
  - The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 02/01/2013. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 11/07/1973, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.
- 

## MFS International Intrinsic Value Fund Class R6

**VRS Code:** 826695

**Fund Objective:** The investment seeks capital appreciation.

**Fund Strategy:** The fund normally invests its assets primarily in foreign equity securities, including emerging market equity securities. Equity securities include common stocks and other securities that represent an ownership interest (or right to acquire an ownership interest) in a company or other issuer. The advisor focuses on investing the fund's assets in the stocks of companies that the advisor believes are undervalued compared to their intrinsic value.

**Fund Risk:** Foreign securities are subject to interest-rate, currency-exchange-rate, economic, and political risks, all of which may be magnified in emerging markets. Growth stocks can perform differently from the market as a whole and can be more volatile than other types of stocks. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Fund short term trading fees:** None

**Who may want to invest:**

- Someone who is seeking to complement a portfolio of domestic investments with international investments, which can behave differently.
- Someone who is willing to accept the higher degree of risk associated with investing overseas.

**Footnotes:**

- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.
  - The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 05/01/2006. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 10/24/1995, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.

**MFS Value Fund Class R6****VRS Code:** 826846**Fund Objective:** The investment seeks capital appreciation.**Fund Strategy:** The fund normally invests the fund's assets primarily in equity securities. Equity securities include common stocks and other securities that represent an ownership interest (or right to acquire an ownership interest) in a company or other issuer. MFS focuses on investing the fund's assets in the stocks of companies the advisor believes are undervalued compared to their perceived worth (value companies).**Fund Risk:** Value stocks can perform differently than other types of stocks and can continue to be undervalued by the market for long periods of time. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. These risks may be magnified in foreign markets. Additional risk information for this product may be found in the prospectus or other product materials, if available.**Fund short term trading fees:** None**Who may want to invest:**

- Someone who is seeking the potential for long-term share-price appreciation.
- Someone who is comfortable with the volatility of large-cap stocks and value-style investments.

**Footnotes:**

- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.
  - The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 05/01/2006. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 01/02/1996, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.
- 

**New York Life Guaranteed Interest Account****VRS Code:** 909139**Fund Objective:** New York Life Guaranteed Interest Account (GIA) is a general account group annuity contract seeking to provide a low-risk, stable investment option. It aims to provide participants with a competitive yield and limited volatility with a guarantee of principal and accumulated interest.**Fund Strategy:** The New York Life Guaranteed Interest Account (GIA) is a stable value product that guarantees principal and accumulated interest. Guarantees are provided to participating retirement plans through a group annuity contract issued by New York Life Insurance Company (New York Life). Contributions are directed to a broadly diversified fixed income portfolio within New York Life's general account. The GIA crediting rate is subject to change every six months following the first contract year. New York Life issues the GIA group annuity contract and provides the guarantee of principal and accumulated interest.

**Fund Risk:** The Contracts and securities purchased for the fund are backed solely by the financial resources of the issuers of such Contracts and securities. An investment in the fund is not insured or guaranteed by the manager(s), the plan sponsor, the trustee, the FDIC, or any other government agency. The Contracts purchased by the fund permit the fund to account for the fixed income securities at book value (principal plus interest accrued to date). Through the use of book value accounting, there is no immediate recognition of investment gains and losses on the fund's securities. Instead, gains and losses are recognized over time by periodically adjusting the interest rate credited to the fund under the Contracts. However, while the fund seeks to preserve your principal investment, it is possible to lose money by investing in this fund. The Contracts provide for the payment of certain withdrawals and exchanges at book value during the terms of the Contracts. In order to maintain the Contract issuers' promise to pay such withdrawals and exchanges at book value, the Contracts subject the fund and its participants to certain restrictions. For example, withdrawals prompted by certain events (e.g., layoffs, early retirement windows, spin-offs, sale of a division, facility closings, plan terminations, partial plan terminations, changes in laws or regulations) may be paid at the market value of the fund's securities, which may be less than your book value balance. Additional risk information for this product may be found in the prospectus or other product materials, if available.

Certain investment options offered by your plan (e.g., money market funds, short term bond funds, certain asset allocation/lifecycle funds and brokerage window) may be deemed by the Contract issuers to "compete" with this fund. The terms of the Contracts prohibit you from making a direct exchange from this fund to such competing funds. Instead, you must first exchange to a non-competing fund for 90 days. While these requirements may seem restrictive, they are imposed by the Contract issuers as a condition for the issuer's promise to pay certain withdrawals and exchanges at book value.

**Fund short term trading fees:** None

**Who may want to invest:**

- Someone who seeks a slightly higher yield over the long term than is offered by money market funds, but who is willing to accept slightly more investment risk.
- Someone who is interested in balancing an aggressive portfolio with an investment that seeks to provide stability of price.

**Footnotes:**

- The investment option is an annuity. The fund is managed by New York Life Insurance Company. This description is only intended to provide a brief overview of the fund.
- This investment option is not a mutual fund.
- Transfers and exchanges to investment options offered through a competing recordkeeping platform, through a company other than Fidelity, may be subject to limitations. Disbursements in excess of 15% per annum may be subject to a market value charge as described in your Plan's contract.

## Vanguard Federal Money Market Fund Investor Shares

**VRS Code:** 845481

**Fund Objective:** The investment seeks to provide current income while maintaining liquidity and a stable share price of \$1.

**Fund Strategy:** The fund invests primarily in high-quality, short-term money market instruments. Under normal circumstances, at least 80% of the fund's assets are invested in securities issued by the U.S. government and its agencies and instrumentalities. The adviser maintains a dollar-weighted average maturity of 60 days or less and a dollar-weighted average life of 120 days or less. The fund generally invests 100% of its assets in U.S. government securities and therefore will satisfy the 99.5% requirement for designation as a government money market fund.

**Fund Risk:** *You could lose money by investing in a money market fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the fund is not a bank account and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's sponsor is not required to reimburse the fund for losses, and you should not expect that the sponsor will provide financial support to the fund at any time, including during periods of market stress.* Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Fund short term trading fees:** None

**Who may want to invest:**

- Someone who has a low tolerance for investment risk and who wishes to keep the value of his or her investment relatively stable.
- Someone who is seeking to complement his or her bond and stock fund holdings in order to reach a particular asset allocation.

**Footnotes:**

- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.
- Weighted average maturity (WAM) is the weighted average of all the maturities of the securities held in a fund. WAM for money market funds can be used as a measure of sensitivity to interest rate changes. Generally, the longer the maturity, the greater the sensitivity. WAM for money market funds is based on the dollar-weighted average length of time until principal payments must be paid, taking into account any call options exercised by the issuer and any permissible maturity shortening devices, such as demand features and interest rate resets. For bond funds, WAM can be used as a measure of sensitivity to the markets. Generally, the longer the maturity, the greater the sensitivity. The WAM calculation for bond funds excludes interest rate resets and only takes into account issuer call options if it is probable that the issuer of the instrument will take advantage of such options.
- For money market funds, weighted average life (WAL) is the weighted average of the life of the securities held in a fund or portfolio, and can be used as a measure of sensitivity to changes in liquidity and/or credit risk. Generally, the higher the value, the greater the sensitivity. WAL is based on the dollar-weighted average length of time until principal payments must be paid, taking into account any call options exercised by the issuer and any permissible maturity shortening features other than interest rate resets. For money market funds, the difference between weighted average maturity (WAM) and WAL is that WAM takes into account interest rate resets and WAL does not. WAL for money market funds is not the same as WAL of a mortgage- or asset-backed security.

**Vanguard Real Estate Index Fund Institutional Shares****VRS Code:** 849961

**Fund Objective:** The investment seeks to provide a high level of income and moderate long-term capital appreciation by tracking the performance of the MSCI US Investable Market Real Estate 25/50 Index that measures the performance of publicly traded equity REITs and other real estate-related investments.

**Fund Strategy:** The advisor attempts to track the index by investing all, or substantially all, of its assets—either directly or indirectly through a wholly owned subsidiary, which is itself a registered investment company—in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index. The fund is non-diversified.

**Fund Risk:** Real Estate is a cyclical industry that is sensitive to interest rates, economic conditions (both nationally and locally), property tax rates, and other factors. Changes in real estate values or economic downturns can have a significant negative effect on issuers in the real estate industry. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. These risks may be magnified in foreign markets. Sector funds can be more volatile because of their narrow concentration in a specific industry. In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Fund short term trading fees:** None

**Who may want to invest:**

- Someone who is willing to accept the potentially lower diversification and higher risks associated with investing in a particular industry or sector.
- Someone who is seeking to complement his or her core holdings with investments concentrated in a particular sector or industry.

**Footnotes:**

- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.
- MSCI US Investable Market Real Estate 25/50 Transition Index measures the performance of publicly traded equity REITs and other real estate-related investments.
- The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 12/02/2003. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 05/13/1996, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.

## Vanguard Small-Cap Growth Index Fund Institutional Shares

**VRS Code:** 848921

**Fund Objective:** The investment seeks to track the performance of the CRSP US Small Cap Growth Index that measures the investment return of small-capitalization growth stocks.

**Fund Strategy:** The fund advisor employs an indexing investment approach designed to track the performance of the CRSP US Small Cap Growth Index, a broadly diversified index of growth stocks of small U.S. companies. The advisor attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

**Fund Risk:** The securities of smaller, less well-known companies can be more volatile than those of larger companies. Growth stocks can perform differently from the market as a whole and can be more volatile than other types of stocks. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. These risks may be magnified in foreign markets. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Fund short term trading fees:** None

**Who may want to invest:**

- Someone who is seeking the potential for long-term share-price appreciation.
- Someone who is willing to accept the generally greater price volatility associated both with growth-oriented stocks and with smaller companies.

**Footnotes:**

- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.
  - The CRSP US Small Cap Growth Index includes U.S. companies that fall between the bottom 2%-15% of the investable market capitalization. There is no lower limit in market capitalization, other than what is specified by investability screens. CRSP classifies growth securities using the following factors: future long-term growth in earnings per share (EPS), future short-term growth in EPS, 3-year historical growth in EPS, 3-year historical growth in sales per share, current investment-to-assets ratio, and return on assets.
  - The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 05/24/2000. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 05/21/1998, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.

**Vanguard Target Retirement 2020 Fund****VRS Code:** 841078**Fund Objective:** The investment seeks to provide capital appreciation and current income consistent with its current asset allocation.**Fund Strategy:** The fund invests in a mix of Vanguard mutual funds according to an asset allocation strategy designed for investors planning to retire and leave the workforce in or within a few years of 2020 (the target year). The fund's asset allocation will become more conservative over time, meaning that the percentage of assets allocated to stocks will decrease while the percentage of assets allocated to bonds and other fixed income investments will increase.**Fund Risk:** The target date funds are designed for investors expecting to retire around the year indicated in each fund's name. The funds are managed to gradually become more conservative over time as they approach their target date. The investment risk of each target date fund changes over time as its asset allocation changes. They are subject to the volatility of the financial markets, including that of equity and fixed income investments in the U.S. and abroad, and may be subject to risks associated with investing in high-yield, small-cap, and foreign securities. Principal invested is not guaranteed at any time, including at or after their target dates. Additional risk information for this product may be found in the prospectus or other product materials, if available.**Fund short term trading fees:** None**Who may want to invest:**

- Someone who is seeking an investment option intended for people in or very near retirement and who is willing to accept the volatility of diversified investments in the market.
- Someone who is seeking a diversified mix of stocks, bonds, and short-term investments in one investment option or who does not feel comfortable making asset allocation choices over time.

**Who may want to invest:**

- Someone who is seeking an investment option that gradually becomes more conservative over time and who is willing to accept the volatility of the markets.
- Someone who is seeking a diversified mix of stocks, bonds, and short-term investments in one investment option or who does not feel comfortable making asset allocation choices over time.

**Footnotes:**

### Vanguard Target Retirement 2070 Fund

**VRS Code:** 913018

**Fund Objective:** The investment seeks to provide capital appreciation and current income consistent with its current asset allocation.

**Fund Strategy:** The fund invests in a mix of Vanguard mutual funds (underlying funds) according to an asset allocation strategy designed for investors planning to retire and leave the workforce in or within a few years of 2070 (the target year). The fund's asset allocation will become more conservative over time, meaning that the percentage of assets allocated to stocks will decrease while the percentage of assets allocated to bonds and other fixed income investments will increase.

**Fund Risk:** The target date funds are designed for investors expecting to retire around the year indicated in each fund's name. The funds are managed to gradually become more conservative over time as they approach their target date. The investment risk of each target date fund changes over time as its asset allocation changes. They are subject to the volatility of the financial markets, including that of equity and fixed income investments in the U.S. and abroad, and may be subject to risks associated with investing in high-yield, small-cap, and foreign securities. Principal invested is not guaranteed at any time, including at or after their target dates. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Fund short term trading fees:** None

**Who may want to invest:**

- Someone who is seeking an investment option that gradually becomes more conservative over time and who is willing to accept the volatility of the markets.
- Someone who is seeking a diversified mix of stocks, bonds, and short-term investments in one investment option or who does not feel comfortable making asset allocation choices over time.

- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.
- 

### Vanguard Target Retirement Income Fund

**VRS Code:** 847728

**Fund Objective:** The investment seeks to provide current income and some capital appreciation.

**Fund Strategy:** The fund invests in a mix of Vanguard mutual funds according to an asset allocation strategy designed for investors currently in retirement. Its indirect bond holdings are a diversified mix of short-, intermediate-, and long-term U.S. government, U.S. agency, and investment-grade U.S. corporate bonds; inflation-protected public obligations issued by the U.S. Treasury; mortgage-backed and asset-backed securities; and government, agency, corporate, and securitized investment-grade foreign bonds issued in currencies other than the U.S. dollar.

**Fund Risk:** The fund is subject to the volatility of the financial markets, including that of equity and fixed income investments. Fixed income investments carry issuer default and credit risk, inflation risk, and interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Principal invested is not guaranteed at any time, including at or after retirement. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Fund short term trading fees:** None

**Who may want to invest:**

- Someone who is seeking an investment option intended for people in retirement and who is willing to accept the volatility of diversified investments in the market.
- Someone who is seeking a diversified mix of stocks, bonds, and short-term investments in one investment option and looking primarily for the potential for income and, secondarily, for share-price appreciation.

**Footnotes:**

- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

## Vanguard Total International Bond Index Fund Admiral™ Shares

**VRS Code:** 894091

**Fund Objective:** The investment seeks to track the performance of the Bloomberg Global Aggregate ex-USD Float Adjusted RIC Capped Index.

**Fund Strategy:** The fund employs an indexing investment approach designed to track the performance of the Bloomberg Global Aggregate ex-USD Float Adjusted RIC Capped Index (USD Hedged). This index provides a broad-based measure of the global, investment-grade, fixed-rate debt markets. It is non-diversified.

**Fund Risk:** Foreign securities are subject to interest-rate, currency-exchange-rate, economic, and political risks, all of which may be magnified in emerging markets. The fund may invest in lower-quality debt securities that involve greater risk of default or price changes due to potential changes in the credit quality of the issuer. In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. Suitable hedging transactions used to reduce or hedge a fund's exposure to changes in the value of the currency may not be available in all circumstances, may not be successful, and may eliminate any chance for the fund to benefit from favorable fluctuations in relevant foreign currencies. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Fund short term trading fees:** None

**Who may want to invest:**

- Someone who is seeking potential returns primarily in the form of interest income rather than through an increase in share price.
- Someone who is seeking to complement his or her core bond holdings with international bond investments and who can tolerate the greater risks associated with foreign investments.

**Footnotes:**

- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.
- The Bloomberg Global Aggregate ex-USD Float Adjusted RIC Capped Index (USD Hedged) includes government, government agency, corporate, and securitized non-U.S. investment-grade fixed income investments, all issued in currencies other than the U.S. dollar and with maturities of more than one year. The index is capped, which means that its exposure to any particular bond issuer is limited to a maximum of 20%. Additionally, issuers that individually constitute 5% or more of the index may not constitute, in the aggregate, more than 48% of the index. If the index, as constituted based on market weights would exceed the 20% or 48% limit, the excess is reallocated to bonds of other issuers represented in the index.

## Vanguard Total International Stock Index Fund Institutional Shares

**VRS Code:** 877800

**Fund Objective:** The investment seeks to track the performance of a benchmark index that measures the investment return of stocks issued by companies located in developed and emerging markets, excluding the United States.

**Fund Strategy:** The manager employs an indexing investment approach designed to track the performance of the FTSE Global All Cap ex US Index, a float-adjusted market-capitalization-weighted index designed to measure equity market performance of companies located in developed and emerging markets, excluding the United States. The fund invests all, or substantially all, of its assets in the common stocks included in its target index.

**Fund Risk:** Foreign securities are subject to interest-rate, currency-exchange-rate, economic, and political risks, all of which may be magnified in emerging markets. Value and growth stocks can perform differently from other types of stocks. Growth stocks can be more volatile. Value stocks can continue to be undervalued by the market for long periods of time. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Fund short term trading fees:** None

**Who may want to invest:**

- Someone who is seeking to complement a portfolio of domestic investments with international investments, which can behave differently.
- Someone who is willing to accept the higher degree of risk associated with investing overseas.

**Footnotes:**

- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.
- The FTSE Global All Cap ex US Index is part of a range of indices designed to help US investors benchmark their international investments. The index comprises large, mid and small cap stocks globally excluding the US.
- The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 11/29/2010. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 04/29/1996, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.

# Step up your contributions with the Annual Increase Program.

**Help boost your contribution amount automatically:** The Annual Increase Program allows you to increase your retirement savings plan contributions automatically each year. It's an easy way to help keep yourself on track as you get closer to retirement.

## ACTION PLAN

- Review the details of the Annual Increase Program
- Choose the amount and date of your annual increase

### How does the Annual Increase Program work?

Choose the amount and date for your annual increase, and the rest is automatic. Each year on the designated date, your contributions will increase by the amount you elected.

### How does the Annual Increase Program benefit me?

Small increases in your contributions can lead to significant benefits in retirement. When you enroll in the Annual Increase Program, you may help ensure a step up in your retirement plan account contributions each year. This means more opportunity for your savings to grow. It can help you save more but feel less of an impact in your take-home pay.

### How do I enroll?

To make your plan's Annual Increase Program part of your retirement saving strategy, log on to NetBenefits® or call your plan's toll-free number to choose the amount and select the date for your annual increase.

### What amount and date should I choose for my annual increase?

Choose an annual increase of 1% or 2% and time it to coincide with your annual review or pay increase. The system follows through by automatically increasing your contribution on your selected date each year.

### What if I need to make changes or withdraw?

You can change or withdraw from the program at any time by calling your plan's toll-free number or by visiting NetBenefits.®

## Additional information about the Annual Increase Program

### Eligibility requirements.

To participate in the program, you must be contributing regularly to your workplace savings plan through payroll deductions. If you stop making regular payroll deductions, your annual increase elections will be maintained on the system until conditions change to allow for the application of your elections.

### After I sign up, when does the increased contribution go into effect?

Your Annual Increase Program elections will take effect as soon as administratively feasible. Therefore, depending on the frequency of your paycheck, it takes a minimum of one to two pay periods for the election to take effect.

### Program elections.

In most circumstances, your increase election will be applied on a pretax basis. If your employer allows Roth deductions, in limited circumstances your election may be applied on a Roth basis.

### Exceptions to program elections.

Your Annual Increase Program elections will be applied until you withdraw from the program, subject to the following exceptions:

- **Plan or statutory limits.** If you are close to or over the maximum percentage or dollar amount that you are allowed to contribute to your retirement plan, none or only some of your increase amount will be applied on your designated increase date. However, if you have made a "spillover" election to continue contributions on an after-tax basis, your annual increase election may be applied for the remainder of the plan year.

- **Suspension of plan contributions.** If you are suspended from making contributions to your plan due to certain plan rules, your program increase will also be suspended. Depending on plan rules, your election may or may not be reinstated at the end of the suspension period.
- **Highly compensated employees (HCEs).** If your designation as an HCE limits or otherwise restricts you from making additional contributions, your contributions may not be increased even if you have elected to participate in the program.
- **Change in employment status.** If your deductions are interrupted due to a change in your employment status such as a leave of absence or disability, your program elections will be held on file. It's a good idea to confirm that you are still enrolled in the program when your deductions begin again.

**Please consult your plan rules for more detailed information. If you have questions, please call your plan's toll-free number or log on to NetBenefits.®**

### **Need Help?**

For additional information about the Annual Increase Program:

- Visit Fidelity NetBenefits®
- Call your plan's toll-free number to speak with a Fidelity Representative

This document provides only a summary of the main features of the DePaul University 403(b) Retirement Plan and the Plan Document will govern in the event of discrepancies.

The Plan is intended to be a participant-directed plan as described in Section 404(c) of ERISA, which means that fiduciaries of the Plan are ordinarily relieved of liability for any losses that are the direct and necessary result of investment instructions given by a participant or beneficiary.
