Access all of the platform features no matter where you are.

- ✓ Complete the health assessment
- ✓ Join a challenge
- ✓ Set up text reminders
- ✓ Sign up for push notifications
- ✓ Track your progress
- ✓ Take a university course
- ✓ Add a peer-to-peer challenge
- ✓ Redeem rewards

FREQUENTLY ASKED QUESTIONS

Q: How do I set up my Mobile Password?

A: To set up your Mobile Password, you must sign in through SSO to the WellRight portal. Once you are logged in, hover over your profile icon on the top right-hand corner of the screen, and you will find the option "Mobile Password." (See the computer screen above)

Q: Why do I need a Mobile Password?

A: Users that access the WellRight portal through SSO will need to use a Mobile Password to access the WellRight App on a mobile device AND to access the portal on a non-company device (outside your network off-hours). This is to ensure that the App is being used by the same individual.

Q: What does Current Password mean?

A: Your "Current Password" should match your network login. This password is what you use to login to your own network on a laptop or desktop computer. Then, set a new password that MUST be different than your Current Password.

Q: Can my Mobile Password be the same as my network/profile password?

A: You must first create a password that is different from your network/profile password. Once your new Mobile Password is set, you can access the WellRight App on your mobile device and then change your Mobile Password in the app if you would like it to match.
