

## The New Desktop

The desktop will look very familiar as it only has some minor changes, so the look and feel is not a radical change. The “Start” button from the Windows XP has been replaced by a Windows icon called the “Start Orb”. It is Microsoft’s attempt to modernize the interface. There is a new look to the taskbar which is taller and has a thumbnail feature. (See Quick Guide on Taskbar for more information).

See the Quick Guide on “Start” for information about the Start Menu.
