### **Medical Forensic Examinations**

The following is a list of locations where a medical forensic examination can be completed, often at no cost. Each hospital has a social worker, women's health advocate, and/or domestic violence liaison that can assist those who have experienced sexual or relationship violence.

For survivors of sexual assault, it is recommended that you specify the reason you are requesting an examination, as you should be provided a private room. Many hospitals have Sexual Assault Nurse Examiners (SANE) on staff. SANE nurses have completed special forensic training with sensitivity and knowledge in treating sexual assault survivors while preserving evidence related to an alleged sex crime. Many locations, as specified below, can also provide you with a medical advocate for sexual assault survivors within one hour. These sexual assault advocates are from a local agency, separate from the hospital and police.

Additionally, under the Illinois Crime Victim's Compensation Act, some individuals who have experienced sexual or relationship violence may be eligible for support services and medical reimbursement if the crime is reported within seven (7) days or, in some cases, even longer. Individuals should check with their insurance providers to explore the applicability of this program.
