

Current Online Declaration Tool Logic – Based on Current Policy as of 3/2014

1. Action: Student declares a concentration or changes their concentration through the tool.
Result: Both major and concentration are updated to current term.
2. Action: Student in an intended major and concentration declares same major and concentration. i.e. intended Accounting to declared Accounting
Result: Declared major and concentration retain the intended major and concentration's requirement term.
3. Action: Student in an intended major and concentration declares same major but changes their concentration.
Result: Both major and concentration are updated to current term.
4. Action: Student in an intended major and no concentration declares a major and a concentration.
Result: Both major and concentration are updated to current term.
5. Action: Student in a major changes their major.
Result: Major is updated to current term.
6. Action: Student ICT's
Result: Program, plan, and subplan given new requirement term with effective dated row of next term.
7. Action: Student makes changes resulting in a new requirement term during a Summer term
Result: Requirement term updates back to the spring term, NOT autumn.
